Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 17-28 in the reply filed on 04/29/2004 is acknowledged.
2. The Restriction is made final.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 17 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by US Patent No. 5,671,008 to Linn.
5. As for claim 17, Linn discloses, in column 11, lines 14-28, a flatbed editing machine, for scanning film, with a pair of plates, 17a and b of Figure 2, which supports reels 19a and b. Linn further discloses, a film gate or film guide assembly, shown as element 14, a bulb or illuminating means, while element 24 is a video camera used for imaging the film. In lines 14-16, of column 11, Linn states that the film travels through a film gate where its image is projected by a bulb onto a screen, and further in lines 29-

Art Unit: 2613

30, that the film gate holds the film in place as it travels, or "guides" it from reel to reel. In order for the film to be projected, as stated, the film guide 14 must have an opening or aperture for light from the bulb, element 22 of Figure 3, to pass through, as the film travels over the aperture. In column 12, lines 39-45, Linn discloses that the camera 24, is preferably a CCD, which is known in the art to output analog video signals responsive to the optical transmission of light images. A CCD is equivalent in the art to Applicant's photosensitive detector, and its functions, as claimed. Furthermore, Linn states, in column 14, lines 13-29, that the analog video signal is transmitted to a digital editing machine, element 40 of Figure 1, which inherently would convert the analog signal to digital, and as further disclosed, edits or manipulates the digital data, to achieve a standard digital format.

Allowable Subject Matter

6. Claims 18-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 23-28 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George A Bugg whose telephone number is (703) 305-2329. The examiner can normally be reached on Monday-Thursday 9:00-6:30, and every other Friday.

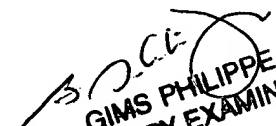

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher S Kelley can be reached on (703) 305-4856. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
